LEGAL DISCLAIMER

IMPORTANT INFORMATION

Prior to making any decisions, it is imperative that you read and comprehend this legal disclaimer. The present disclaimer is applicable to the aforementioned document, and it is strongly recommended that you thoroughly review its contents prior to accessing the Coincrib white paper. By accessing the white paper, you acknowledge that you have carefully read, comprehended, and agreed to the terms and conditions explicitly outlined in this notice.

RESTRICTIONS

This legal disclaimer states that the white paper about Coincrib is intended only to provide technical information about the company and is not a prospectus, offer document, or solicitation of investment. It does not constitute investment advice or personalized recommendations, and investors should consult their advisors before purchasing CRIB Tokens. The white paper has no legal validity and cannot be relied upon for damages arising from actions related to the Token. The CRIB utility token will not be registered under or offered in accordance with the applicable securities. Therefore, to the extent the laws of any state, province, territory, county, or jurisdiction of the United States (USA), Asia, Europe, Africa, Australia or any jurisdiction in which such offers or solicitations prior to registration, exemption from registration or qualification under securities laws are subject to such jurisdiction, no offer, solicitation, advertising or whatsoever will be made with respect to citizens, permanent residents, associations and/or green card holders and all residents of the United States (USA), Asia, Europe, Africa or any jurisdiction. CRIB Tokens are not intended to be sold in any jurisdiction where the distribution of Tokens is unlawful.

FORWARD-LOOKING STATEMENTS

This legal disclaimer states that the white paper may contain forward-looking statements, such as future results of operations and plans, which may involve risks and uncertainties. These statements may be affected by unknown factors that could lead to results, performance, or achievements that are materially different from what was projected in the forward-looking statements. The company, its directors, employees, agents, and consultants do not provide any express or implied representation, responsibility, or liability regarding the accuracy or completeness of the information contained in the white paper. Finally, the white paper is not meant to be legal, regulatory, or tax advice.

NO LEGAL, REGULATORY OR TAX ADVICE

The white paper does not provide any investment, legal, corporate, or tax advice and is not a substitute for evaluating your own financial situation and needs. Potential investors should conduct their own analysis and seek professional advice before making any investment decisions. The white paper is not comprehensive and may not contain all the necessary information, so buyers should consult with their advisors and agree to the terms and conditions outlined in the white paper.

INTRODUCTION

Within the blockchain industry, staying current with the latest requirements is even more crucial, as it is a rapidly evolving and dynamic space that is driving significant innovation across various sectors. Given the potential impact of blockchain technology, organizations that keep up with the latest advancements and regulatory developments will be best positioned to seize opportunities, mitigate risks, and gain a competitive edge in the marketplace. As such, staying abreast of the latest requirements and standards within the blockchain industry is essential to unlocking the full potential of this transformative technology.

Coincrib S.A. is a fintech and crypto company based in Panama with a lofty mission to revolutionize the trading industry by providing a comprehensive and easily accessible marketplace for everyone. The platform aims to simplify the trading process by bringing together material, virtual, and financial systems in one place, creating a faster, sustainable, secure, and barrier-free trading experience for B2B, B2C, and C2C sectors.

As the world becomes increasingly reliant on digital currencies and e-commerce, the lack of central platforms that unite everything remains a major challenge in the crypto world. Many traders face significant obstacles that prevent them from accessing and using these platforms. However, Coincrib's complex trading platform seeks to address this issue by accepting cryptocurrency payments globally and introducing an all-in-one trading marketplace.

One of the major issues currently facing traders is the various barriers on different trading platforms, making it difficult for traders with limited budgets to participate. Moreover, these platforms often require complex identification processes, lack accessibility and transparency, and are prone to errors. Transactions between cryptocurrencies, commodities, goods, and converting to fiat are also challenging, further adding to the problem. To solve these issues, Coincrib's platform will offer a wide range of services for commercial and private customers, including a booking portal for travel, holiday homes, experiences, gastronomy, online tutors, and virtual and physical products and services. Additionally, the company aims to establish its bank and crypto exchange as part of the platform, providing a comprehensive and all-in-one trading experience for all its customers.

As a Panamanian fintech and crypto company, Coincrib seeks to provide a solution that opens up a complex trading venue to a wider audience worldwide and processes transactions faster, more transparently, and more cost-effectively than other platforms. The company plans to use its profits to strengthen its position and reinvest in commodities such as gold & silver, real estate, or innovative business models to secure profits and assets.

INTRODUCTION

Coincrib aims to provide a fairer and more transparent marketplace, eliminating concerns about provenance and safety. The company has ten years of experience trading on crypto and regular platforms and markets, making it experts in the field of investment technologies. This combination of experience and insight enables the company to offer secure, highly transparent, and flexible services.

Coincrib's services have been reviewed and selected by its team of experts with assured knowledge, providing investors with access to global assets, transactions, and projects that are typically only available on global platforms and auction houses. Coincrib's unique combination of experience and insight enables it to offer secure, highly transparent, and flexible services to investors worldwide.

To mark the beginning of its journey towards implementing complex transaction processing and a novel trading platform, Coincrib will launch its first Initial Coin/Exchange/DEX Offering using the CRIB token. The company aims to build a platform that will continue to grow with future Coincrib offerings, making it a one-stop-shop for all trading needs.

In conclusion, Coincrib S.A. is set to transform the trading industry by providing a complex and accessible trading marketplace for everyone, eliminating barriers and providing faster, sustainable, and secure trading opportunities. The company's unique combination of experience and insight enables it to offer secure, highly transparent, and flexible services to investors worldwide. With its focus on innovation and reinvestment, Coincrib is poised to take the trading industry by storm and establish itself as a market leader in the years to come.

FULL CRYPTO SHOPPING MARKETPLACE

ACCESSIBLE TO ANY TYPE OF PARTICIPANT

OWN PAYMENT PROVIDER & EXCHANGE SERVICE

WE HEAR YOU! COMMUNITY IS KING

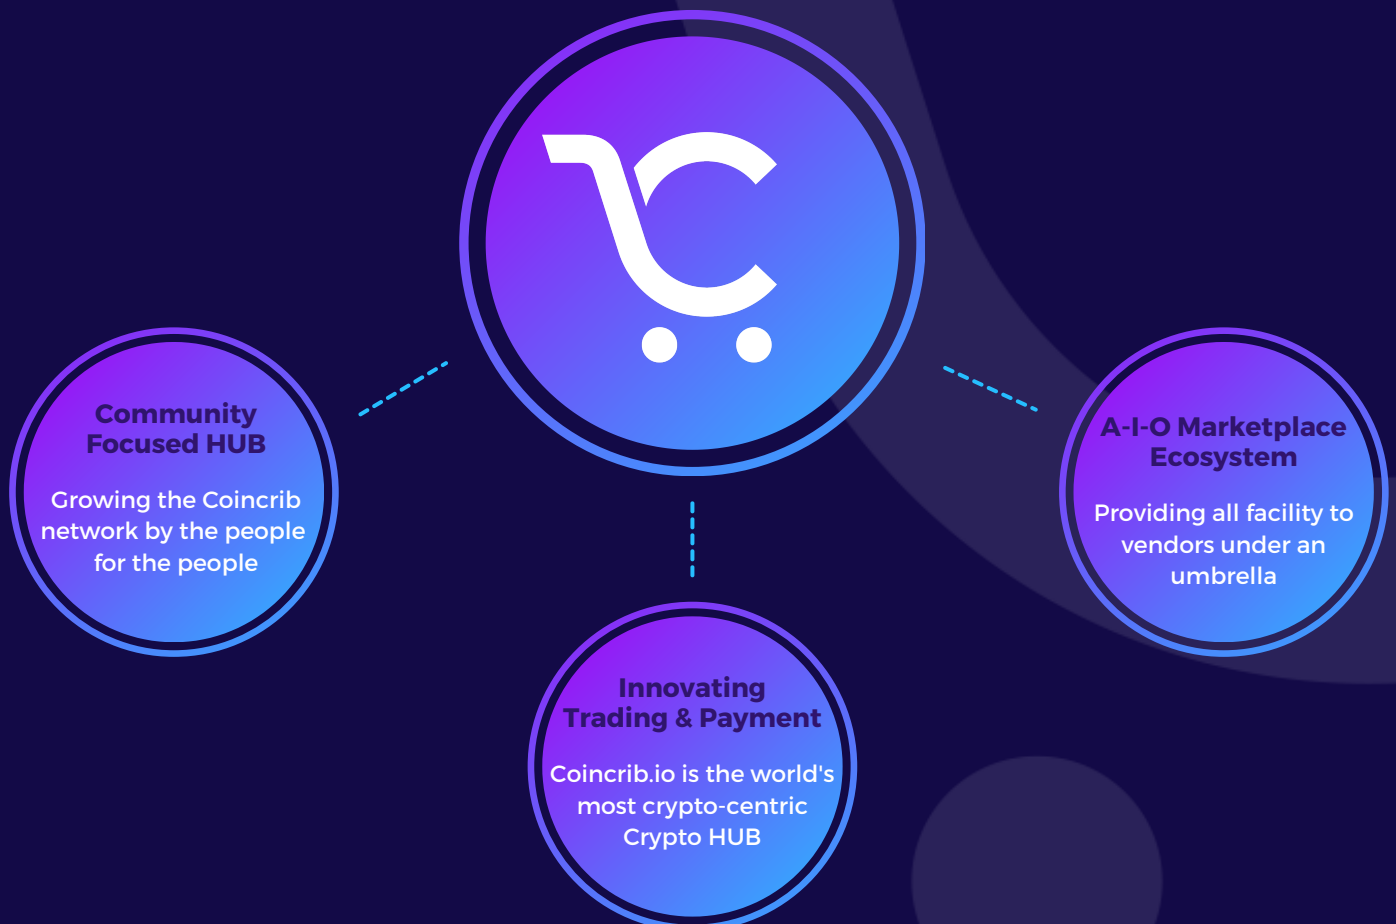

VISION

At Coincrib, we envision a world where everyone has access to a comprehensive marketplace that offers everything they need, including previously unattainable wealth-building strategies. We believe that financial freedom and control should be accessible to all, and we aim to provide the tools to make this a reality through our CRIB token and other tokenized products. Our goal is to become a leading provider of e-commerce and digital securities, leveraging the power of blockchain technology to serve a global audience.

We aspire to offer futuristic products like NFTs and Metaverse products, as well as everyday services like schooling, shopping, medical assistance, and banking, all accessible through our secure and user-friendly platform. By breaking down borders and offering unparalleled privacy, we seek to create a truly global business ecosystem that empowers individuals and communities worldwide.

COINCRIB VISION IS ENCAPSULATED WITH THREE MAIN COMPONENTS

MISSION

Coincrib's mission is to revolutionize blockchain investments by making them more accessible and easier to navigate. Our experienced team combines traditional trading marketplaces with cutting-edge technologies to establish ourselves as industry leaders. With over a decade of experience, we understand the challenges in these industries and believe that crypto technologies have matured and are now secure enough to create digital utilities in an attractive and complex trading marketplace. Our passion and commitment to our mission set us apart, and we are excited to continue making a significant impact in the industry through our innovative approach.

OUR MISSION

Ushering in a new era of online shopping and integrating payment with digital assets into everyday life through mass adoption.

To tokenize the e-commerce industry, facilitating investment opportunities for individuals while getting paid in crypto.

To open all possibilities equally to each participant as an important member.

To function as a digital asset that is completely community-focused and community-driven but centralized.

To create a new payment method and habit that is applicable worldwide, even if you are not a crypto expert or experienced user.

Streamline the process of trading digital assets and ensure that all investors can engage with ease.

To reduce volatility and augment positive price pressure in the holding of digital assets.

Increase data security through a central HUB, as there is no need to use multiple platforms and register.

ECOSYSTEM

COINCRIB.IO PLATTFORM ECOSYSTEM

A glimpse into our marketplace ecosystem and the core services we will be offering in the future. It will be a Shopping CRIB for you and your best friends. We don't want to reveal too much, but we will redefine the shopping experience.

SERVICES OF COINCRIB

1. SHOP & PAY WITH CRYPTO

Coincrib is a revolutionary crypto marketplace that enables buyers and merchants to purchase, sell, and import goods with ease. Coincrib will have its own banking provider. With Coincrib, buyers can use cryptocurrencies to make secure transactions without worrying about fraud or other issues that typically arise with traditional payment methods. The platform also allows merchants to accept payments in Coincrib and other popular cryptocurrencies, making it easier for them to expand their customer base and reach new markets. Furthermore, Coincrib's user-friendly interface and efficient checkout process make it simple for users to shop and pay for products in just a few clicks.

2. CHARITY & SOCIAL VOTING

Coincrib is a community-driven platform that encourages active participation from its users. The platform features a unique social voting system that allows users to vote on new features and enhancements they would like to see on the platform. This ensures that Coincrib is always evolving to meet the needs of its users. Additionally, Coincrib is committed to giving back to society and encourages charitable giving through its platform. Users can participate in charity campaigns and donate to causes they care about through the platform. The community-driven approach to feature development and charity campaigns sets Coincrib apart from other marketplaces and provides a sense of belonging to its users.

3. E-SCHOOLING & DOCTOR SERVICE

Coincrib is also a platform that offers a range of virtual services, including e-schooling and doctor services. With the rise of online learning, Coincrib provides a platform for students to find experienced tutors for a wide range of subjects. Whether it's math, science, or languages, students can find the right tutor to fit their needs. Additionally, Coincrib offers virtual doctor consultations, providing users with access to healthcare professionals from the comfort of their homes. This is especially useful for users who may live in remote areas or have mobility issues. With Coincrib's e-schooling and doctor services, users can access a range of virtual services, making their lives easier and more convenient.

SERVICES OF COINCRIB

4. BOOKING-RENTAL & FOOD DELIVERY

Coincrist is a one-stop shop for all your booking and rental needs. Whether you're looking to book a holiday, rent a car, or order food, Coincrist has got you covered. With just a few clicks, users can browse and book accommodations for their next holiday, choose from a range of rental car options, or order food from their favorite restaurant. Coincrist's platform makes it easy to compare prices and options, ensuring that users get the best deals possible. Additionally, the platform offers secure and efficient payment options, making the booking and rental process hassle-free. Whether you're planning a vacation or just need to rent a car or order food, Coincrist makes the process quick, easy, and convenient.

5. BUY & SELL CRYPTO OR FIAT

Coincrist offers a versatile platform for users to buy, sell, and exchange both cryptocurrencies and fiat currencies. With Coincrist, users can easily buy and sell their favorite cryptocurrencies, including Coincrist, as well as exchange them for other cryptocurrencies or fiat currencies. The platform also allows users to send money globally, making it easy to conduct international transactions with minimal fees. Coincrist's secure and user-friendly platform makes it easy for users to manage their crypto and fiat assets, ensuring that they are always in control of their finances. With Coincrist, users can easily navigate the world of cryptocurrencies and fiat currencies, without having to worry about complicated processes or high fees.

6. SECURE WEB3 WALLET

Coincrist provides a secure wallet that enables users to store, manage, and track their cryptocurrencies with confidence. The wallet is designed with top-of-the-line security features, including multifactor authentication, encryption, and backup and recovery options. With the Coincrist wallet, users can easily manage their crypto assets, including Coincrist and other popular cryptocurrencies, from a single interface. The wallet's user-friendly interface makes it easy for users to track their portfolio performance, monitor their transaction history, and receive notifications about important events. Additionally, Coincrist's wallet is accessible from anywhere in the world, making it convenient for users to manage their crypto assets on the go. With Coincrist's secure wallet, users can have peace of mind knowing that their cryptocurrencies are safe and easily accessible.

ECOMMERCE INDUSTRY

AN OVERVIEW

The ecommerce industry is a rapidly evolving landscape, characterized by constant innovation and disruption. From the early days of online marketplaces like eBay to the rise of giant ecommerce platforms like Amazon and Alibaba, the industry has come a long way in a relatively short period of time.

One of the key drivers of ecommerce growth is the increasing number of consumers who prefer to shop online. As digital natives become the dominant consumer demographic, traditional brick-and-mortar retailers are facing intense competition from online merchants. This trend has been further accelerated by the COVID-19 pandemic, which has prompted a dramatic shift towards online shopping as consumers seek to avoid in-person interactions.

In addition to changing consumer behavior, the ecommerce industry is also being shaped by advances in technology. The rise of mobile commerce, for example, has fundamentally altered the way that consumers interact with ecommerce platforms. The increasing prevalence of smartphones and tablets has made it easier than ever for consumers to shop on-the-go, and retailers are investing heavily in mobile optimization to meet this demand.

Another key trend in the ecommerce industry is the move towards personalized and customized shopping experiences. By leveraging data analytics and artificial intelligence, retailers are able to offer tailored recommendations and targeted marketing campaigns to individual consumers. This approach not only increases customer engagement and loyalty, but can also drive higher conversion rates and average order values.

Looking ahead, the ecommerce industry is likely to continue evolving and adapting to changing consumer needs and technological advances. Retailers will need to stay nimble and innovative in order to thrive in this fast-paced and dynamic industry as new technologies like augmented reality and virtual reality become more prevalent in online shopping.

The ecommerce industry is currently thriving, and ecommerce platforms are playing a key role in its growth. Online shopping has become increasingly popular over the past few years, and the COVID-19 pandemic has only accelerated this trend. As a result, ecommerce platforms are seeing explosive growth as businesses rush to set up online stores and expand their online offerings. Ecommerce platforms are getting bigger as they continue to develop and offer more features and capabilities. For example, many platforms now offer mobile optimization, social media integration, and even artificial intelligence-powered product recommendations.

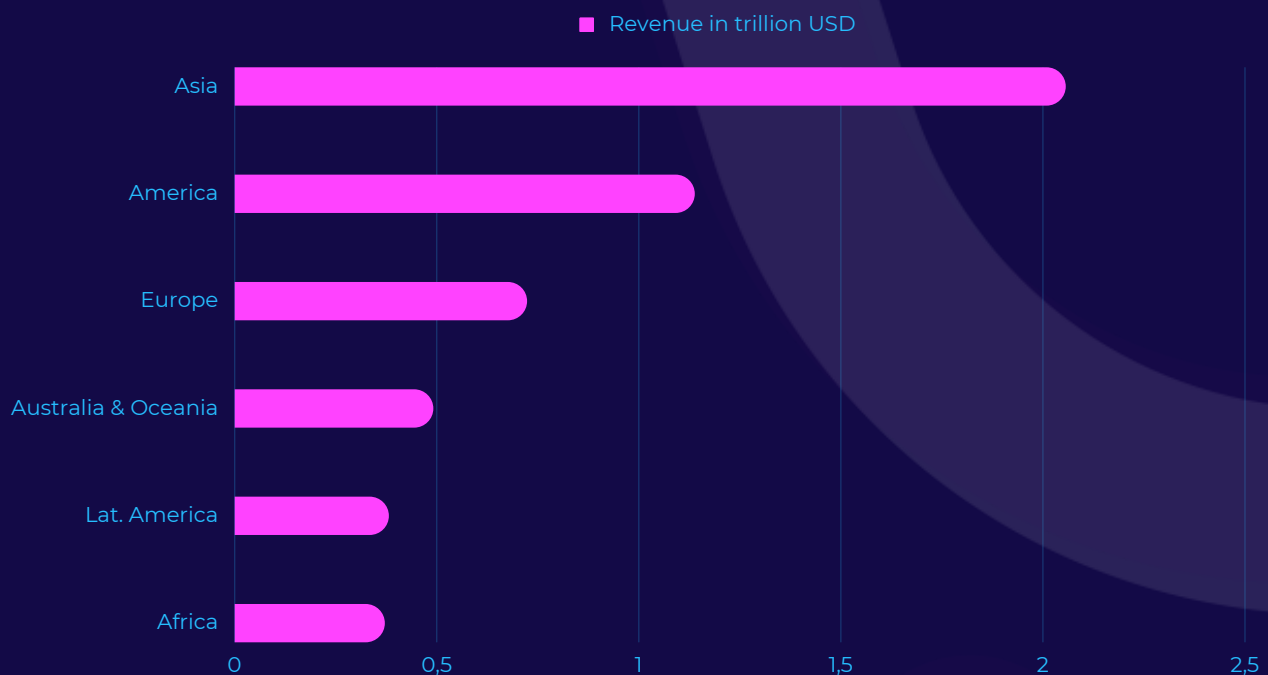

ECOMMERCE MARKET SIZE

These advancements are helping ecommerce platforms become more user-friendly and effective, and are contributing to the industry's overall growth. Additionally, ecommerce platforms are often able to leverage economies of scale, which allows them to offer lower costs to businesses and consumers alike. This makes ecommerce more accessible to a wider range of businesses and customers, which in turn fuels further growth. Overall, the ecommerce industry and its platforms are likely to continue growing and evolving in the coming years as more businesses and consumers embrace online shopping.

In recent years, e-commerce has become an integral component of the global retail industry. The advent of the internet has brought about significant changes to the buying and selling of goods, much like other industries. With the ongoing digitalization of modern life, consumers around the world have been able to benefit from the advantages of online transactions. The number of individuals making purchases online is growing at a rapid pace, thanks to the surge in global internet access and adoption. Currently, there are over five billion internet users worldwide. In 2022, retail e-commerce sales were projected to exceed 5.7 trillion U.S. dollars worldwide, with expectations of reaching new heights in the coming years.

It is anticipated that Asia will have the largest cumulative revenue from retail e-commerce in 2023, exceeding two trillion U.S. dollars. Following this, the Americas will generate the second-highest online shopping revenue, approximately 1.1 trillion dollars. On the other hand, African e-commerce revenue will be the smallest worldwide, at around 44 billion U.S. dollars.

Source [statista.com](https://www.statista.com): Total retail ecommerce revenue worldwide in 2023

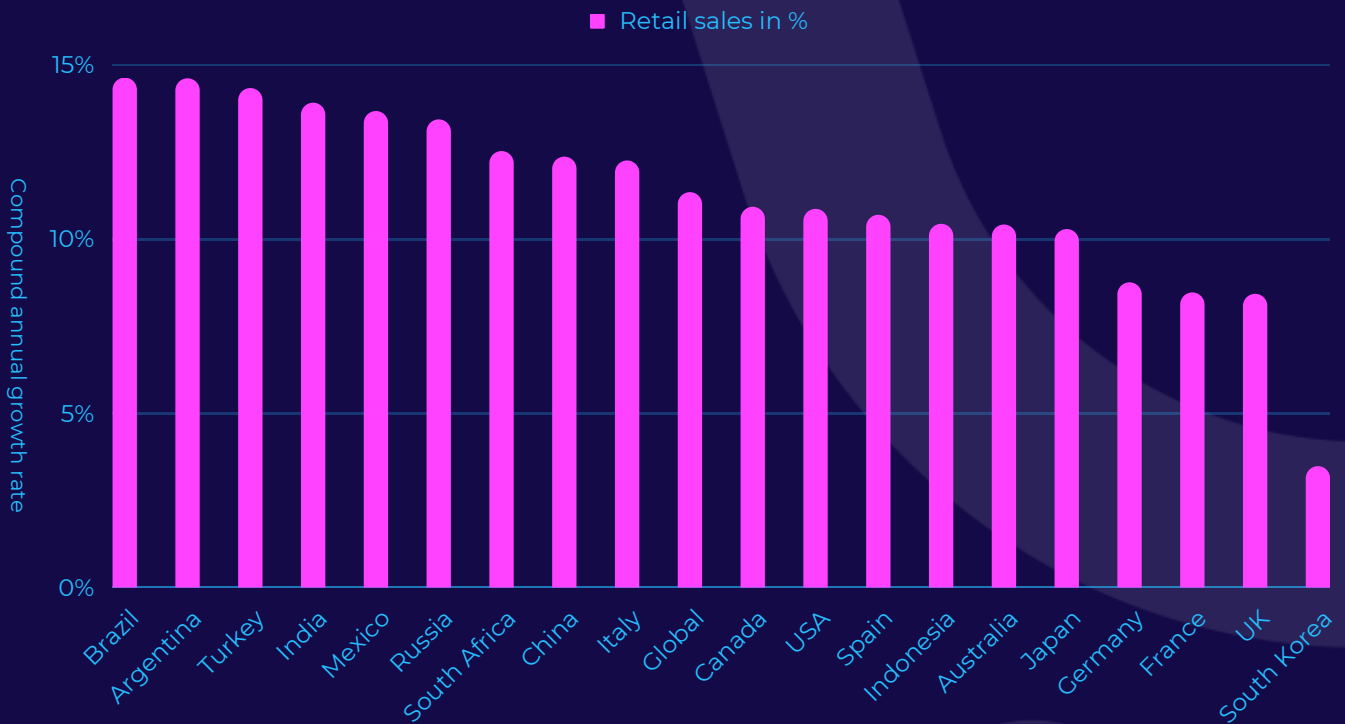

E-COMMERCE MARKET SIZE

The eCommerce market is set to experience tremendous growth in the coming years. In 2023, revenue is projected to reach a staggering US\$4.11tn, with an annual growth rate (CAGR 2023-2027) of 11.51%. This growth rate is expected to result in a market volume of US\$6.35tn by 2027.

China is expected to generate the most revenue in the eCommerce market, with a projected market volume of US\$1,487.00bn in 2023. The number of users in the eCommerce market is also expected to increase significantly, with 5.29bn users projected by 2027. User penetration is predicted to be 57.2% in 2023 and is expected to hit 66.6% by 2027. Additionally, the average revenue per user (ARPU) is expected to be US\$0.93k. These projections highlight the immense potential of the eCommerce market and the opportunities it presents for businesses to grow and expand their operations.

Recent industry estimates indicate that Brazil is poised to take the lead among 20 countries globally in the development of retail e-commerce between 2023 and 2027, with a compound annual growth rate of 14.6 percent. Argentina and Turkey are also expected to experience substantial growth in e-commerce, with a CAGR of more than 14 percent. The global retail e-commerce CAGR during this period was projected to be 11.3 percent.

COINCRIB REVENUE EXPECTATION CALCULATION AND FORECAST

HOW WE CALCULATE THE PRICE?

We don't have to worry about the quality of our products. We cannot predict the market development and use the minimum and bad values for the calculation.

\$CRIB TOKEN PRICE EXCLUDED

The calculation refers purely to the online marketplace and does not include the price development of the CRIB token.

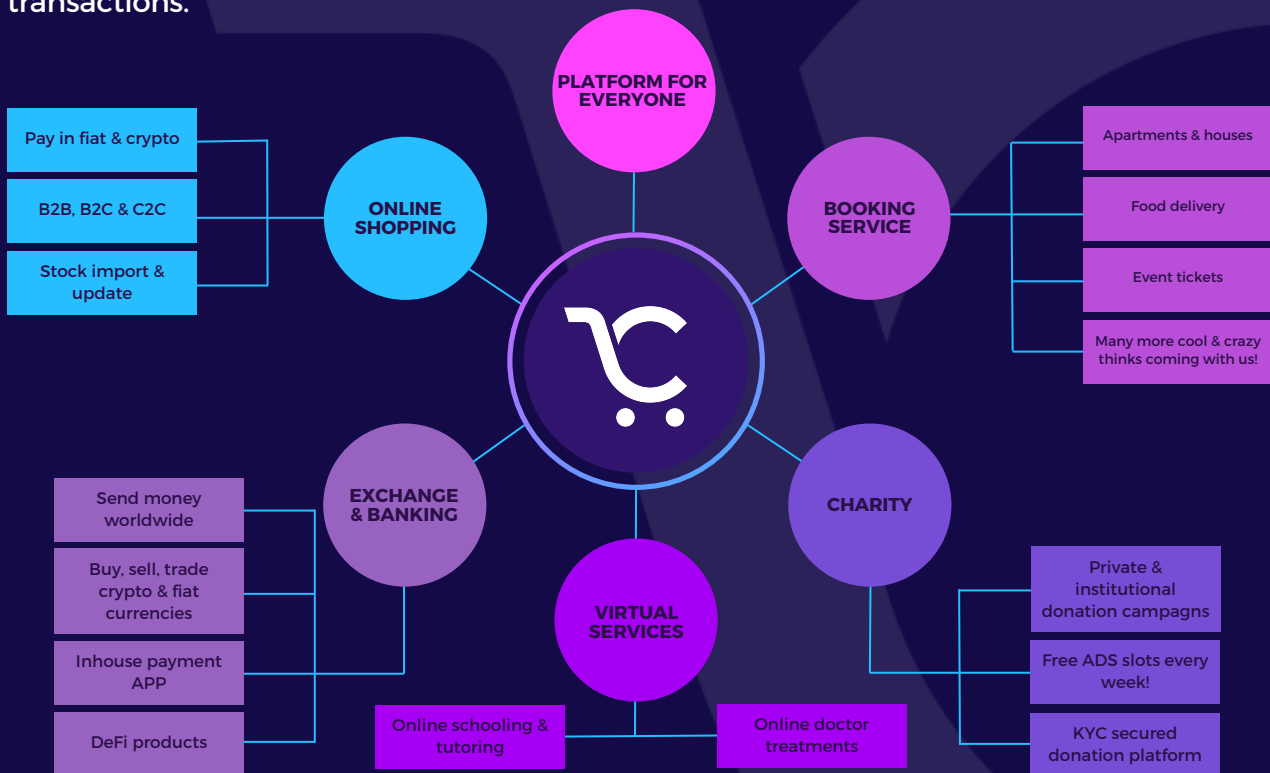

*Based on past performance and consistent with forecasts. No guarantee for the achievement of goals within the deadlines or the company existence. No promise of profit. The token price or the development is to be assessed separately and is not part of the balance sheet.

REVOLUTIONIZING ECOMMERCE WITH BLOCKCHAIN

The ecommerce industry has been rapidly growing over the past few years, and with it, the need for secure, efficient, and transparent transactions. Blockchain technology has emerged as a promising solution to address these needs and has the potential to revolutionize the ecommerce industry. Its decentralized and immutable nature makes it ideal for ensuring secure and transparent transactions, which is crucial in today's digital economy. One of the most significant benefits of blockchain technology is its ability to provide secure and transparent transactions. Through blockchain, ecommerce businesses can create a decentralized system that reduces the need for intermediaries, enhances the customer experience, and eliminates fraud. This not only improves the trust between businesses and customers, but also reduces the time and cost of transactions.

In addition, blockchain technology is transforming ecommerce through tokenization, smart contracts, and cybersecurity enhancements. Tokenization allows businesses to create digital representations of physical assets, providing customers with unique, secure, and tradable assets. Smart contracts enable businesses to automate complex transactions without intermediaries, reducing time and cost while eliminating the risk of human error and fraud. Moreover, by storing data on a decentralized network, ecommerce businesses can reduce the risk of cyberattacks and comply with data privacy regulations. Blockchain technology has the potential to transform the ecommerce industry by providing increased security, transparency, efficiency, and access to global markets. As more businesses adopt blockchain technology, they can offer more secure, transparent, and efficient services to their customers and remain competitive in the ever-growing ecommerce market. The example above shows what complex products we can build with blockchain combined with ecommerce and payments.

CHALLENGES AND SOLUTIONS OF COINCRIB MARKETPLACE

REGULATORY COMPLIANCE

Challenge:

As the cryptocurrency market is still relatively new and unregulated, Coincrib may face challenges in complying with existing regulations, or in navigating new regulations that may be introduced in the future. This could result in increased costs and operational challenges for the platform.

Solution:

To address regulatory compliance challenges, Coincrib could work closely with regulators to understand and comply with existing regulations, as well as to shape new regulations in a way that is beneficial for the platform and its users. Additionally, Coincrib could invest in robust compliance processes and systems to ensure that it meets regulatory requirements.

CYBER ISSUES & HACKS

Challenge:

The decentralized nature of cryptocurrencies and blockchain technology makes them vulnerable to security risks, such as hacks and theft. Coincrib will need to ensure that its platform is secure and that users' assets are protected from potential security breaches.

Solution:

To mitigate security risks, Coincrib could invest in top-notch security measures such as encryption, multifactor authentication, and backup and recovery options. The platform could also engage with reputable cybersecurity firms to perform regular audits and penetration testing to ensure that its systems are secure and free from vulnerabilities.

ADOPTION AND AWARENESS

Challenge:

Despite the growing popularity of cryptocurrencies, many people are still unfamiliar with how they work and how to use them. Coincrib may face challenges in educating potential users about its platform and the benefits of using cryptocurrencies for transactions.

Solution:

To address adoption and awareness challenges, Coincrib could invest in marketing and educational campaigns to raise awareness about cryptocurrencies and how to use them. The platform could also partner with educational institutions and organizations to offer courses and training on cryptocurrency and blockchain technology.

CHALLENGES AND SOLUTIONS OF COINCRIB MARKETPLACE

MARKET VOLATILITY

Challenge:

The cryptocurrency market is known for its volatility, with prices often fluctuating rapidly and unpredictably. This could pose a challenge for Coincrib in terms of managing the risk associated with accepting and holding cryptocurrencies, as well as in setting prices for goods and services.

Solution:

To manage the risks associated with market volatility, Coincrib could implement risk management strategies such as hedging and diversification. The platform could also partner with third-party providers to offer users with tools and resources to manage their crypto portfolios.

COINCRIB COMPETITORS

Challenge:

Coincrib is entering a crowded marketplace with many established players, including traditional e-commerce platforms and other crypto marketplaces. Coincrib will need to differentiate itself and offer unique value propositions to attract users and stand out from the competition.

Solution:

To differentiate itself from competitors, Coincrib could focus on offering unique value propositions such as lower fees, a more user-friendly interface, or exclusive partnerships with merchants. The platform could also offer incentives such as rewards or loyalty programs to attract and retain users.

PAYMENT OPTIONS

Challenge:

While cryptocurrencies are gaining popularity, they are still not widely accepted as a form of payment. Coincrib may face challenges in encouraging merchants to accept cryptocurrencies as a payment option, as well as in providing users with alternative payment options for those who do not yet have access to cryptocurrencies.

Solution:

To address the challenge of limited payment options, Coincrib could partner with third-party providers to offer alternative payment methods such as credit cards, bank transfers, or mobile payments. Additionally, the platform could incentivize merchants to accept cryptocurrencies by offering lower transaction fees or other benefits.

COINCRIB STAKING

WHAT IS "PROOF OF STAKE"

WHAT IS CRYPTO STAKING?

Proof-of-stake verification is a crucial part of cryptocurrencies that use cryptographic tokens. In a proof-of-stake system, investors who own the cryptocurrency can help validate transactions on the blockchain database. They usually require a minimum number of coins to be able to verify transactions.

WHAT DOES "CRYPTO VALIDATION" MEAN?

A decentralized computer network called "validators" checks transactions to confirm their validity and ensures that the ones that are recorded in a cryptocurrency's blockchain are accurate. As payment for doing this, they receive some cryptocurrency. But those who stake their coins and sign up to be validators run the risk of losing some of their investment if they approve transactions that break the rules of a cryptocurrency, which could be fraudulent.

Even those who don't have enough money to become validators themselves can pledge their coins with a validator and earn rewards. Therefore, even those with a few coins can participate in the staking program and receive rewards if they use a crypto exchange or other crypto platform. Your account will be credited with rewards as you earn them.

Proof-of-stake validation is used by many of the most well-known cryptocurrencies, including Ethereum, but not all of them, including the most valuable cryptocurrency, Bitcoin. To validate transactions and maintain its blockchain, Bitcoin uses proof-of-work, which consumes more computing power than proof-of-stake.

HOW DO I EARN MONEY WITH \$CRIB STAKING?

Market participants can participate in staking by purchasing the \$CRIB token and generating passive income with it. The \$CRIB token must be deposited on the platform and blocked for a certain period of time. The amount of the reward depends on the blocking period. We need to say that the tokens increasing, but the value can decrease meanwhile due to impermanent loss. This method is popular and mostly used by hodlers because they hold the tokens for a long time and see them as a long-term investment. In a bull run, the hodlers then make more returns because they now have more tokens or coins than before because of the rewards.

BENEFITS OF STAKING

WHY IS EVERYBODY STAKING?

NO HARDWARE IS REQUIRED

Crypto Staking does not require specialized equipment, like proof of work. It functions without requiring any expensive equipment. The only requirement is to stake the Coincrib on any linked exchange for a specified amount of time.

SECURED BY SMART CONTRACT

Security and privacy are the major concerns in digital assets and Coincrib provides a swift and stable portal that is backed by the Coincrib ecosystem making him superior to others. Coincrib is offering a highly secure and fast platform to users for Staking crypto.

MORE COST-EFFECTIVE

Our BEP20 blockchain is a very cheap and energy-efficient system that doesn't need any expensive or specialized equipment. Compared to proof-of-work chains, it is less costly and less damaging to the environment. By using the CRIB platform, the stakeholders may generate more passive income.

ECO FRIENDLIER

One of the major benefits of Staking CRIB Token is that it doesn't need a continuous supply of energy to validate the Transaction. As a result, it is environmentally friendly.

PASSIVE INCOME

Stakeholders will be able to earn by staking and managing their digital assets.

HIGH SCALABILITY

Coincrib has greater scalability because of its higher transaction speed and low fee.

EXAMPLE HOW TO STAKE YOUR TOKEN

BUY \$CRIB WITH FIAT OR TRADE WITH CRYPTO

START EARN PASSIVE INCOME ON YOUR \$CRIB TOKEN

DEPOSIT YOUR \$CRIB INTO THE STAKING POOL

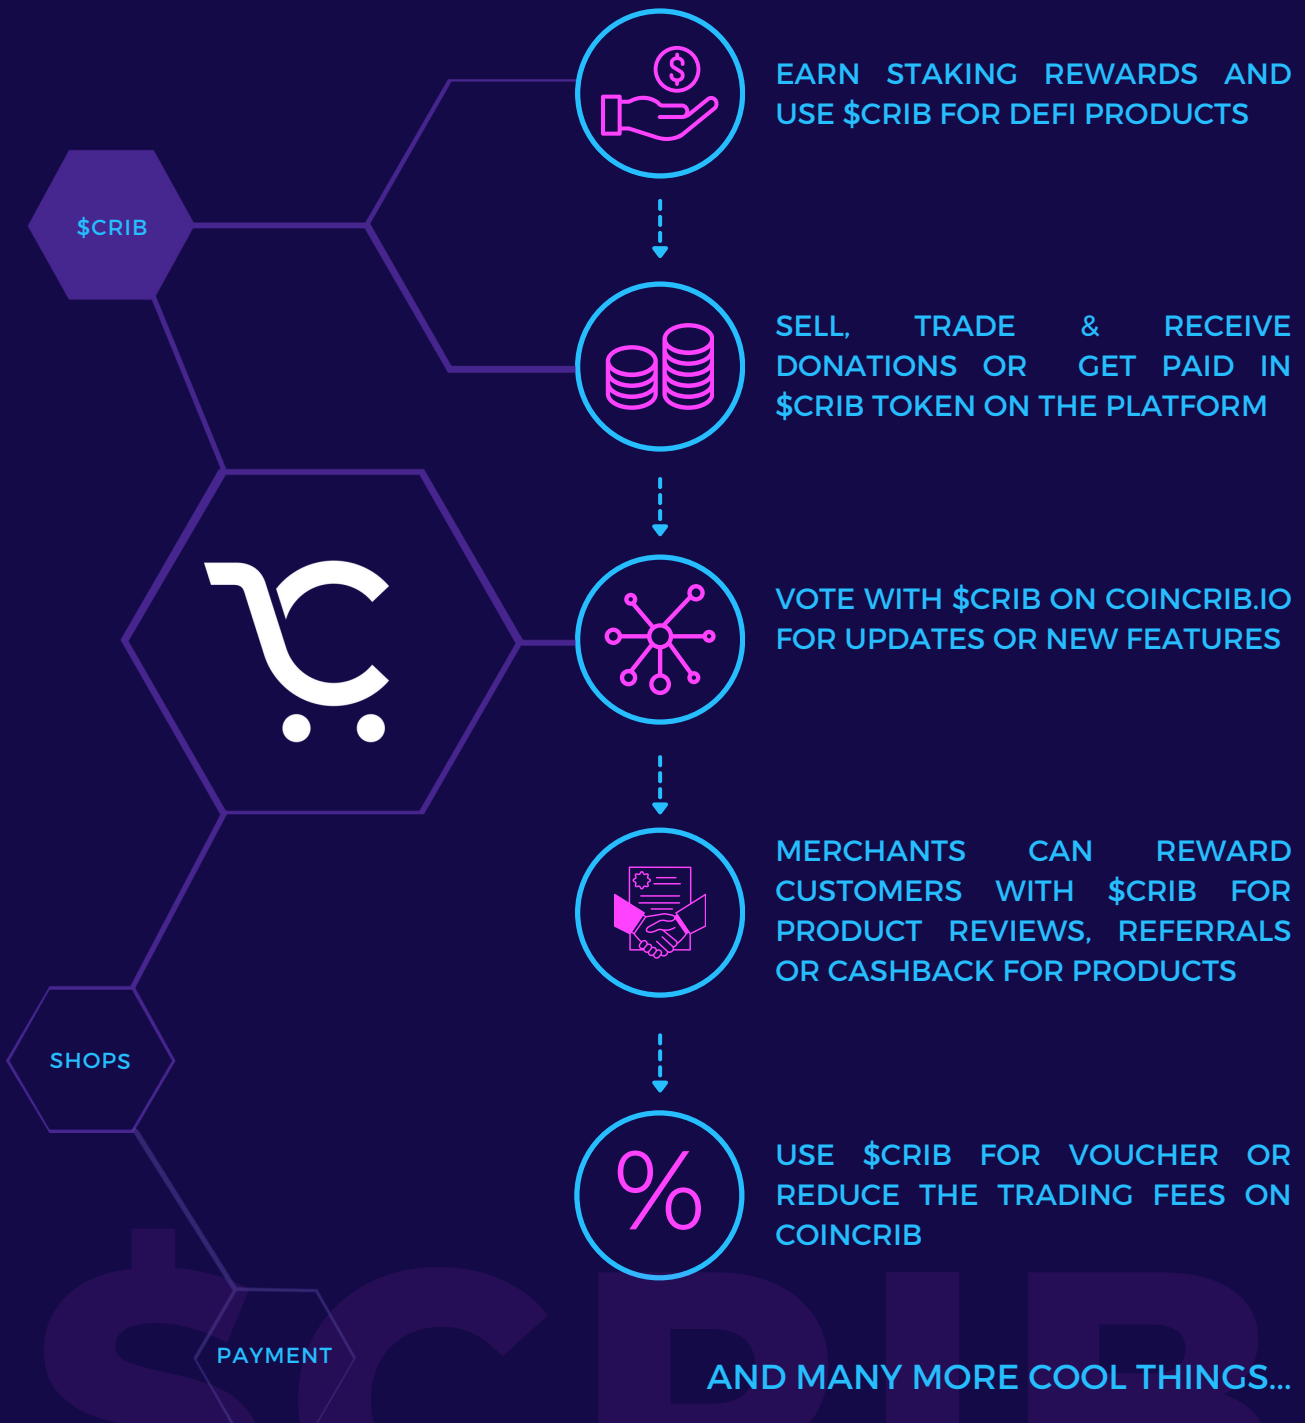

SIGN THE SMART CONTRACT TO START EARNING REWARDS

COINCRIB TOKEN UTILITY DETAILS

HOW WE USE \$CRIB TOKEN

\$CRIB UTILITY

COINCRIB TOKEN UTILITY DETAILS

HOW DOES COINCRIB MARKETPLACE WORK?

WHO CAN SELL AND BUY ON COINCRIB?

Anyone on Coincrid can sell and buy goods or services. We accept private and business providers. Business providers can take advantage of business packages that make trading more attractive.

IS IT SAFE TO BUY & SELL ON COINCRIB?

Yes, it is! It is just as secure as trading on regular online platforms or shops. Although we want to be as decentralized as possible, user safety will be our top priority. Commercial sellers are verified via KYC and private users are also verified from a certain trading volume.

WHY KYC & AML?

As a trading marketplace, we see it as our top priority to stop black market and illegal activities. The payment process via WEB3 wallets is and will remain a decentralized and secure transaction. However, crypto payment providers also follow strict guidelines to ensure customer safety. In some jurisdiction, even DeFi projects need a KYC. Therefore, we have to secure some processes on our portal to protect customers.

HOW TO IMPORT & UPDATE PRODUCTS?

Every seller can edit and import their products, stock, prices, and data via a CSV file, API interface or plugin of the shop system. For private sellers, the import is only available via CSV and is limited to a certain amount. We try to support the most common shop systems. Unfortunately, this is not possible for all shop systems due to the development costs and maintenance costs.

HOW DOES THE PAYMENT WORK ON COINCRIB?

Sellers list the item and have the option to auction the item or choose a fixed price. They also pick which currencies they accept. With Coincrid V1, the cryptocurrencies can be limited by payment providers. At Coincrid V2, we always try to pick the best exchange route with the lowest exchange fees. After the winning bidder or buyer has purchased the item, the person can decide whether to pay for the item in fiat or crypto. At check-out, you can select various payment providers that offer FIAT or crypto, or use your own WEB3 or other wallet by selecting the desired option.

COINCRIB TOKEN UTILITY DETAILS

HOW DOES COINCRIB MARKETPLACE WORK?

HOW SECURE IS A PAYMENT IN CRYPTO & COINCRIB PROTECT US?

Payments in crypto are usually secure and irreversible thanks to blockchain technology. Therefore we have to identify users through KYC to guarantee security. Otherwise, the platform is community based and developed with the priority of fairness for everyone.

WHO HANDLES THE SHIPPING OF THE GOODS?

The seller is responsible for shipping and proper delivery. When advertising, he defines the price and delivery time of the goods.

HOW DOES COINCRIB ENSURE THE GROWTH OF THE TOKENS?

No one can say where the price will go. However, the fact is that the more people use the platform, the more people buy the token. Since the token is also used on the platform as a reward or utility token, active real participants must have some in order to benefit from the advantages at all. From a certain size of the company, we will coordinate how or when the burning function will be activated. In the future we plan to use a certain part of our fees to buy the tokens back or burn the token directly in the transaction.

WHO HANDLES THE RETURNING COSTS OF THE TRANSACTION?

The transaction fees are always borne by the respective party and are not deductible. The sales commission is reimbursed to the seller when the amount is refunded or reimbursed pro rata in the case of a credit note.

HOW CAN I BUY OR SELL \$CRIB TOKEN?

The token is currently not listed anywhere and can only be purchased via an IDO or ICO. After the token sale is over, we will list the token on exchanges. At the beginning we focus on DEX's like Pancake Swap and later on CEX's. On which one exactly? Not known for now! Please stay tuned for updates on the website.

ON WHICH BLOCKCHAIN DOES THE \$CRIB TOKEN RUN?

The \$CRIB token is a BEP20 token on the Binance Chain. This blockchain is one of the most popular, most successful and therefore one of the most secure blockchains in the world.

COINCRIB TOKEN UTILITY DETAILS

HOW DOES COINCRIB MARKETPLACE WORK?

HOW IS THE \$CRIB TOKEN SECURED FROM HACKERS?

The \$CRIB token is distributed to various hardware cold wallets. Hardware wallets are usually not hackable unless the keys are made public. In order to proceed transactions, the hackers must either have the private keys or have direct access to the wallets. To further increase the already high level of security, we distribute the tokens to different wallets.

WHY DO I NEED THE \$CRIB TOKEN?

You don't need the \$CRIB token. However, you forego the benefit of the platform. By using the \$CRIB token you save trading fees, you can vote when it comes to introducing new products and features for example.

BENEFITS HOLDING \$CRIB

- Save trading fees.
- Voting possibility.
- Staking and access to DeFi products.
- Merchants can reward community members with \$CRIB tokens if they buy the product, advertise, evaluate or use it permanently in the form of bonuses. Dealers determine the amount, term or interval themselves.

Example 1: As an example, merchants could set a 5% discount to be refunded in \$CRIB tokens after the 5th purchase of a product or order as a loyalty bonus.

Example 2: Merchants can set a referral value, which is paid out in \$CRIB tokens if the items are successfully evaluated, brokered or advertised.

- You can receive donations or pay out in \$CRIB. The token is absolutely necessary for this.
- You benefit from the price growth as the token price increases with the popularity of the platform.
- You can use \$CRIB as payment or sending money to your friends. As we continue to work on our product, we will certainly develop many more cool products around the \$CRIB token. Much more about this at Launch!

COINCRIB TOKEN UTILITY DETAILS

HOW DOES COINCRIB MARKETPLACE WORK?

WHAT ARE OUR INPUT STREAMS?

This is the best and most frequently asked question in a start-up. Since we are a broad, modern and smart platform, we have several income opportunities that we use.

THESE ARE OUR PLATFORM REVENUE STREAMS:

- Earnings from trading fees
- Sale of advertising slots
- Placement of advertisements by ADS
- Service fees by commercial packages
- Income through banking service at Coincrib V2
- Income for IT services on the platform itself. For example, creating NFT'S for companies, programming the interfaces for importing and managing the products and other services that we unfortunately do not want to name yet as a competitive advantage for us!
- Token price increase!

MORE TO COME IN THE FUTURE

Unfortunately, we cannot map all processes and services, as we are still at the beginning and the competition could be strategically and financially ahead of us. This could mean that competitors could copy us and deliver products faster due to their greater resources.

However, that doesn't change the fact that we were first to market.

COINCRIB IS #1

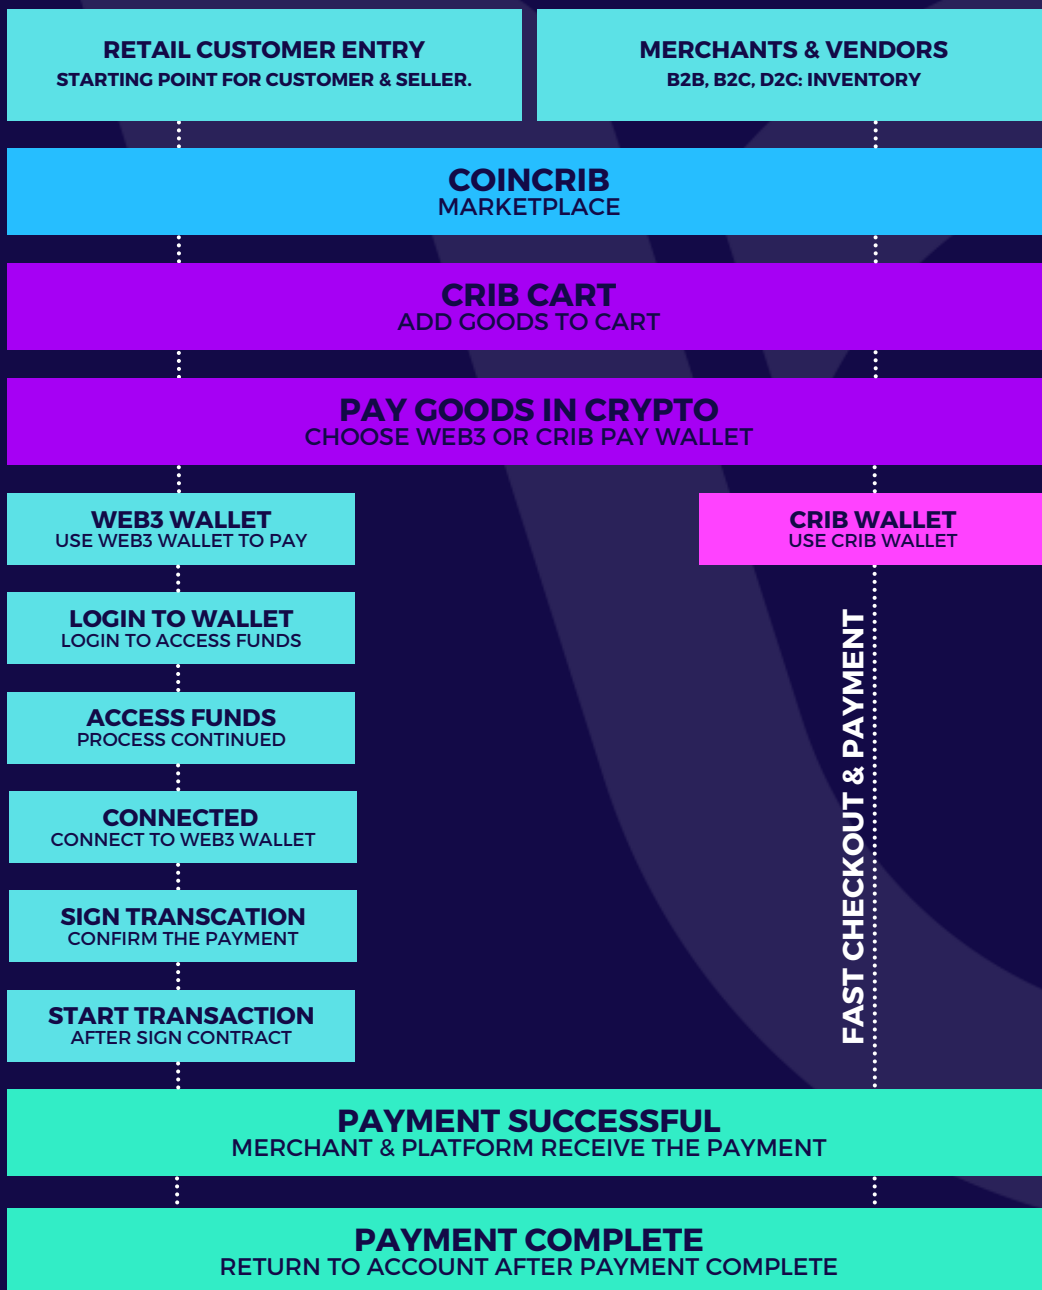

COINCRIB TOKEN UTILITY DETAILS

HOW DOES COINCRIB MARKETPLACE WORK?

HOW WE USE THE BLOCKCHAIN

We use the blockchain to process payments with \$CRIB or to transfer ownership. The blockchain is also used for staking to lock the tokens during lock time.

WEB3 WALLET

Using a web3 wallet, the transaction requires more steps, but users are always in control of their funds.

CRIB WALLET

Use our in-house CRIB wallet, we will use your balance sheet for the payment. This is the cheapest and fastest way to pay.

TOKEN DETAILS

USECASE, TICKER, SUPPLY & LISTING INFORMATION

This is an overview of our \$CRIB token. Here you will find all the information you need about the blockchain used, the number of tokens, what use case it has and what other coins or tokens you can use to buy \$CRIB tokens from the ICO-IDO-IEO.

Token Name: Coincrib

Token Ticker: \$CRIB

Usecase: Utility

Total Supply: 1.000.000.000

Chain: BNB Smart Chain

Buy With: USDT, USDC, BUSD

\$CRIB TOKEN ADDRESS:

0xd78B99B99F9566d080B4F09dfE7061412e08EA90

[View on BSC Scan](#) 

TOKEN SALE DATES

We publish when and where token sales take place for the respective periods on the website and in the social media channels. Don't forget to sign up for the newsletter, so you don't miss the launch.

LISTING & LIQUIDITY

At this point in time, we don't know exactly when and where we will list the token. The focus is on well-known decentralized exchanges such as Pancake Swap in Q1 2024. At the last token sale, we will list the token for the first time and thus make it tradable. For the launch, we deposit a percentage of the public sale liquidity to set the trading price. You will find out more information about the listing as soon as a decision has been made on our website or in the social networks.

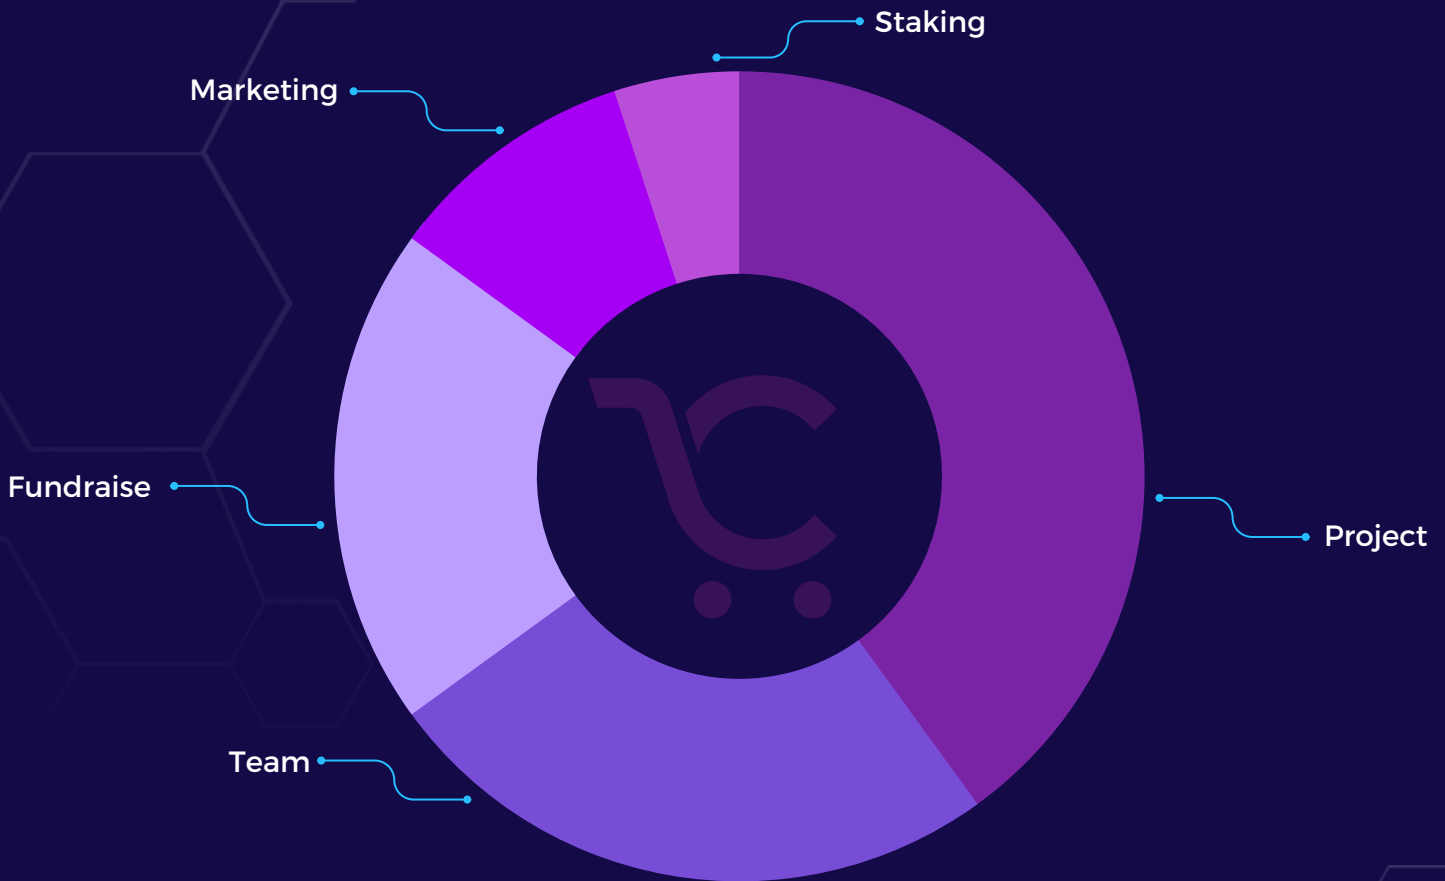

VESTING CLIFF FOR \$CRIB

Make sure you visit our website for vesting details before launch.

TOKEN ALLOCATION

HOW WE DISTRIBUTE THE TOKEN

100%

Total Supply of \$CRIB token is 1,000,000,000. No more can be minted. Burning wa implemented and we might burn some tokens in the future.

25%

25% Goes to the founder (TEAM). And will be released from time to time into the market.

10%

10% Is allocated for Marketing campaigns, To make sure the project can grow and be successful.

40%

40% Is used to pay Employees, listing fees, create DeFi products, airdrops,, administration, VC's and will be released along the project into the market.

20%

20% Is used to collect funds in multiple IEO, ICO or IDO rounds along the project.

5%

5% Is used for Staking of CRIB token.

ROADMAP

WE DIVIDED THE PROJECT INTO 2 PHASES

PHASE 1

- 1. Pre-sale for \$CRIB token & connect to investors**
Token sale to raise liquidity and expand our team. VC pitching to raise liquidity and either speed up development or improve quality.
- 2. Financial distribution, planning the marketplace**
Distribution of financial resources and start of conversation with the developer to launch the marketplace and its features.
- 3. Start development**
Begin with marketplace development Work on import plugins & marketing strategy.
- 4. Start testing**
Start with alpha testing and marketing campaigns. After testing, stores can start uploading inventory and set up CRIB WALLET. Parallel marketing to reach dealers.
- 5. Public sale & launch on exchange**
Public sale and token launch. Preparation for obtaining a banking, crypto exchange license and launching the marketplace.

PHASE 2

- 1. Launch Coincrib V1 & implement DeFi products**
Launch of the platform 1.0. Start selling and buying in crypto or fiat. Start applying for a banking and crypto exchange license. Develop DeFi products like Staking.
- 2. Develop the payment platform & exchange**
Planning of the payment system, exchange, app development for Android & iOS. Prepare for listing on several exchanges.
- 3. Apply banking licence & expand marketplace**
Applying for a banking license to set up a new payment service & exchange.
- 4. Connect the marketplace with new payment system**
Implementation of payment service and exchange to improve user experience, reduce transaction fees and become more independent.
- 5. Full launch of Coincrib V2**
Full launch of Coincrib V2, including CEX-/ DEX apps, bookings, events and global payment in fiat & crypto currencies.

WHY CHOOSE COINCRIB?

A COUPLE OF REASONS WHY YOU SHOULD

Coincrist is a project for the community and for financial freedom. We all have to be successful somehow, but not at any price! That is exactly our philosophy of life. We don't just want to be successful alone. With the community we manage to make more people successful.

EASE TO USE

Ease of use is the reason Coincrist has value. All you need is a smart device, and an internet connection and instantly you become your own payments and money transfers.

BLOCKCHAIN SECURED

Coincrist is far more secure than other record-keeping systems because each new transaction is encrypted and linked to the previous transaction. Coincrist is formed by a complicated string of mathematical numbers and is impossible to be altered. This immutable and incorruptible nature of the Coincrist token makes it safe from falsified information and hacks once formed.

EXPERIENCED FOUNDER

Coincrist's founder has extensive expertise in both business worlds. The experience in the regular offline business world, in e-commerce and the crypto industry. This experience makes it possible to realize the project and avoid mistakes from the beginning.

LOWER FEES

The fees associated with Coincrist transactions are far less than those associated with debit, and credit cards as well as wire transfers, and BACS payments.

TRANSPARENT & IMMUTABLE

With Coincrist, every time coin exchanges are recorded on the blockchain, there is an audit trail to understand where the coins came from. This can not only help improve security and prevent fraud in exchange-related trades, but also help verify the authenticity of the assets being traded.

UNIQUE PROJECT

There is no project like Coincrist yet. We owe this unique selling proposition (USP) to our competence. This experience enables us to develop a product that has never existed before. The future with us is guaranteed to be innovative and unique.

COINCRIB TEAM

LEARN MORE ABOUT THE TEAM

ARCANGELO MAGNO
FOUNDER & CEO

Hi, my name is Arcangelo Magno. I have already founded successful companies in the furniture industry and e-commerce with over 13 Years Wholesale know-how and IT. Over the years I realized the potential of blockchain and that's why I decided to start this project. I have complete confidence in blockchain technology and look forward to promoting it with innovative ideas and thus paving the way for mass adoption or improving it. I want to thank every user of our platform!

As technology advances, we humans are increasingly forced to adapt. Progress is coming and can no longer be stopped. It is all the more important to understand where the opportunities of digitization lie, instead of always looking for and emphasizing the negative aspects. Coincib.io is about merging technology and bringing it closer to everyday life. We are convinced that the world our children will live in will have nothing to do with today.

In many years of independence and the further development of various corporate strategies, we realized year after year that selling online was steadily increasing until it even became normal everyday life. Instead of advertising online and selling goods in stores, the focus is now on e-commerce sales and trying to steal customers away from the competition with increasingly clever SEO strategies. The crypto industry will sooner or later experience a similar, if not steeper, trajectory. The crypto industry is maturing and scam projects can be identified faster and faster. Governments are heading towards digital currencies and are also trying to save themselves and thus control us.

Why? Very easily! They now recognize the inevitable and try to own or control this technology as quickly as possible. This is an indication that it must be something very big. With coincib we are setting a milestone in the history of e-commerce and look forward to building a competent, futuristic and committed team around the e-commerce project of tomorrow. Our goal is to help shape the future and become the market leader in digital payments for crypto e-commerce.

Our team consists of a network of different people and well known companies. We are under construction and are constantly expanding. To save money we outsource our work to keep it cheaper and efficient. Become a world changer too and join Coincib.

COINCRIB TOKEN AUDIT

AUDIT REPORT

NO CRITICAL ISSUES FOUND IN SMART CONTRACT

The contract does not contain issues of high or medium criticality. This means that no known vulnerabilities were found in the source code.

CONTRACT CANNOT SET HIGH FEES

The fees, if applicable, can be a maximum of 25% or lower. The contract can therefore not be locked. Please take a look in the comment section for more details.

CONTRACT CANNOT BLACKLIST

It is not possible to lock user funds by blacklisting addresses.

CONTRACT OWNER CANNOT MINT

It is not possible to mint new tokens.
